

COMPANY BROCHURE

Engineering what comes next.

Civil construction.
Industrial capability.
Infrastructure for progress.

FROM CONCEPT TO COMPLETION

A coordinated partner for
complex construction.

hindconstructions.in

Engineering strength. Accountable delivery.

Hind Constructions brings together civil engineering, project coordination and on-site execution for industrial facilities, commercial developments and transport infrastructure.

BUILDING WITH PURPOSE

With offices in Delhi NCR and Jaipur, the company supports projects across India through turnkey Engineering, Procurement and Construction (EPC) services. Its capabilities span foundations, concrete structures and pre-engineered steel buildings.

A CONNECTED CAPABILITY

**Engineering
Procurement
Construction**

Construction photographs in this brochure are illustrative images used on the company website.

One partner. Four core disciplines.

A construction offering shaped around the demands of each asset.

01

Industrial construction

Manufacturing plants, warehouse structures and heavy industrial facilities.

[EXPLORE / 04](#)

02

Commercial construction

Corporate towers, business parks and retail developments.

[EXPLORE / 05](#)

03

Civil infrastructure

Bridges, elevated transport structures and road networks.

PLANNING / STRUCTURES / EXECUTION / HANDOVER

BUILT AROUND YOUR OPERATION

Industrial strength. Operational purpose.

From manufacturing floors to logistics facilities, Hind Constructions combines steel structures, equipment foundations and durable concrete systems for demanding industrial environments.

Steel & PEB structures

Pre-engineered building erection and fabricated steel portal frames.

Machine foundations

Equipment grouting and RCC foundations for industrial installations.

Industrial flooring

VDF concrete floors for warehousing and heavy-duty use.

Warehouse shells

Structures supporting storage, material handling and logistics.

Commercial spaces. Built to perform.

Hind Constructions develops office towers, technology parks and retail spaces, bringing structural execution together with contemporary building systems.

Structural flexibility

Post-tensioned slabs for commercial floor layouts.

Building envelope

Integrated curtain walls and glass facades.

Below-ground space

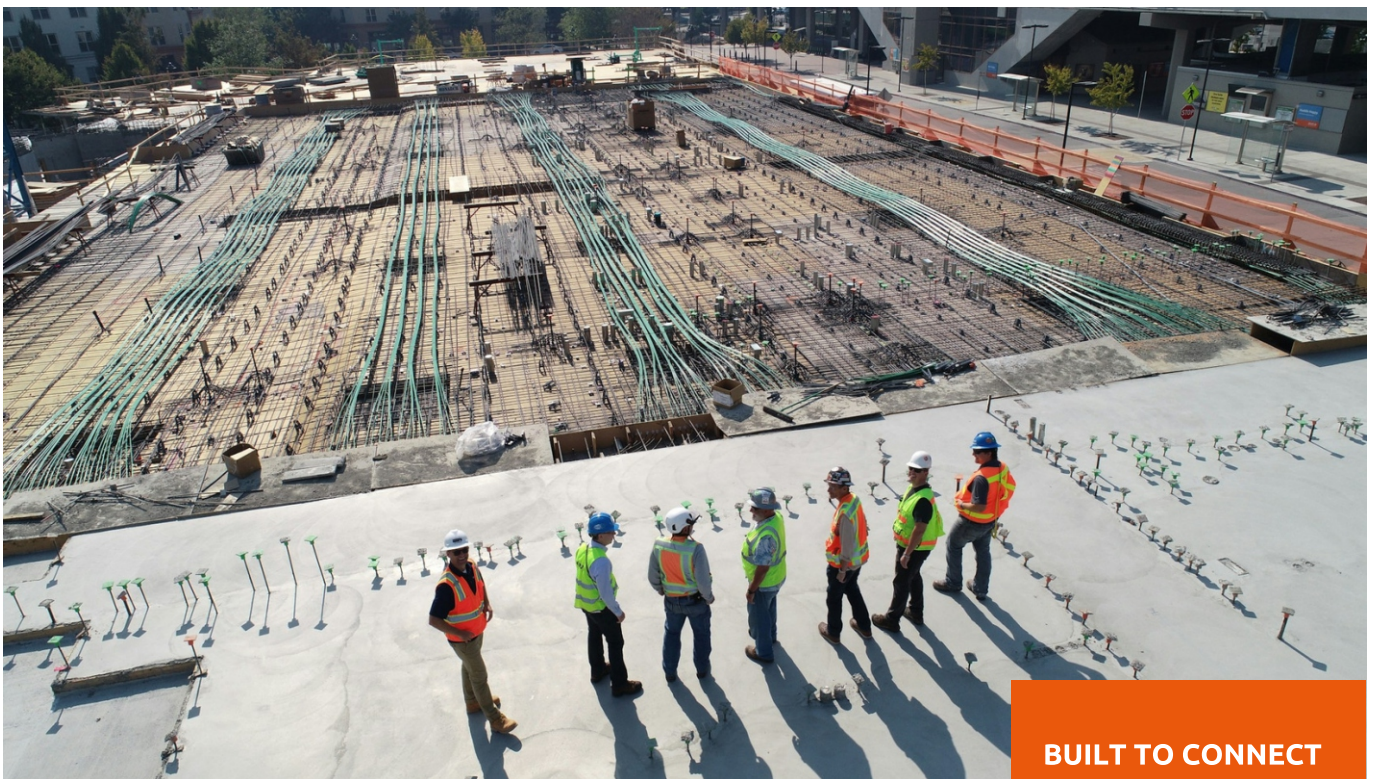

Multi-level basements and retaining structures.

CORPORATE OFFICES / TECH PARKS / RETAIL

Infrastructure that connects progress.

Civil works for the movement of people, goods and opportunity.

BUILT TO CONNECT

Hind Constructions undertakes transport structures including flyovers, elevated road segments, metro facilities and transit hubs. Precast components and reinforced concrete form part of its delivery capabilities.

Bridges & flyovers

Segmental girders

Urban transport

Elevated metro structures

Civil systems

Precast & retaining walls

Confidence begins below ground.

Specialist foundations for complex structural demands.

BORED PILING

Large-diameter piles for deep foundations.

DIAPHRAGM WALLS

Engineered walls for deep sub-grade works.

GROUND IMPROVEMENT

Soil stabilization and foundation preparation.

SPECIALIST SOLUTIONS

Micro-piling and complex foundation scopes.

From ground conditions to build strategy.

The site investigation, structural requirements and construction brief guide the foundation approach.

A coordinated route from brief to handover.

Engineering, Procurement and Construction under one delivery model.

01

Understand & engineer

Review the brief, ground conditions and structural requirements.

02

Procure & verify

Coordinate materials, sourcing and quality checks.

03

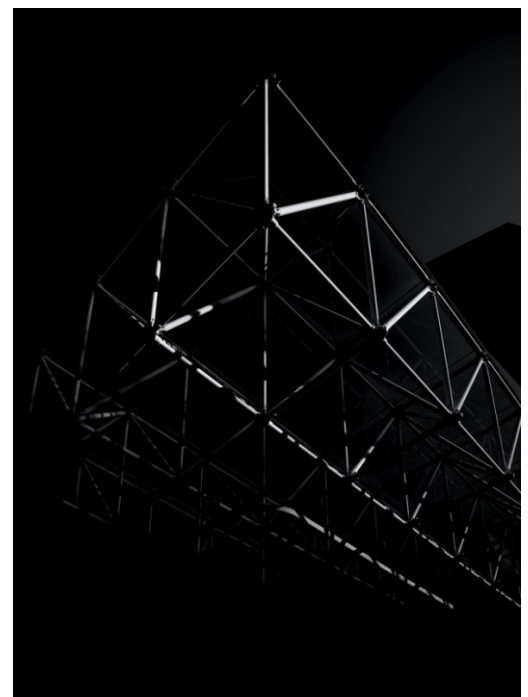

Construct & coordinate

Manage structural execution, site resources and project milestones.

04

Inspect & hand over

Complete final inspections and technical documentation.

START WITH A CLEAR BRIEF

Share your project location, proposed use, scope and expected timeline.

Include available drawings, a bill of quantities and site or soil reports.

THE DISCIPLINE BEHIND DELIVERY

Quality in the detail. Care on every site.

QUALITY ASSURANCE

Material checks and concrete testing support structural execution. The company describes slump checks and strength testing, with records maintained for client review.

ISO 9001:2015

Quality management

ISO 14001:2015

Environmental management

ISO 45001:2018

Occupational health & safety

Management certifications stated on the company website.

SAFETY IN DAILY PRACTICE

Site protection

PPE, barriers and controlled work areas.

Team awareness

Daily toolbox talks and routine inspections.

Workforce care

On-site health checks and safety oversight.

Environmental care

Dust suppression and site controls.

CONSTRUCTION METHODS

Mivan formwork / Post-tensioning / Precast components / VDF flooring

A portfolio across sectors and regions.

INFRASTRUCTURE

2025

Narmada River Flyover

Madhya Pradesh

3.2 km overwater segment

INDUSTRIAL

2024

Apex Manufacturing Plant

Dahej SEZ, Gujarat

450,000 sq. ft.

COMMERCIAL

2025

Zenith Business Park Towers

Goregaon East, Mumbai

1,200,000 sq. ft. | G+24

RESIDENTIAL

2024

Vrindavan Residential Complex

Whitefield, Bengaluru

850,000 sq. ft. | 5 towers

INFRASTRUCTURE

2023

IGI Airport Tunnel & Taxiway

New Delhi

Tunnel and taxiway overpasses

INDUSTRIAL

2024

Storage Dome & Refining Sheds

Jamnagar, Gujarat

300,000 sq. ft.

Project details as published on the company website. Photographs are illustrative.

The people behind every commitment.

FOUNDER & CEO

Mohd Salim

Leading a team focused on engineering, project delivery and the coordination that connects each stage of construction.

Bintu Kumar

Senior Engineer

Parvej Aalam

Project Head &
Billing Head

Avanish Kumar

Project Head

Vaibhav Tiwari

Senior Engineer

Engineering expertise. Project oversight. Shared responsibility.
